

Autonomous Enterprise Platform for Financial Services

Transformation Can No Longer Be Linear

Financial institutions have invested in digitization, automation, data platforms and AI. Yet most organizations still operate through fragmented systems, functions and sequential processes.

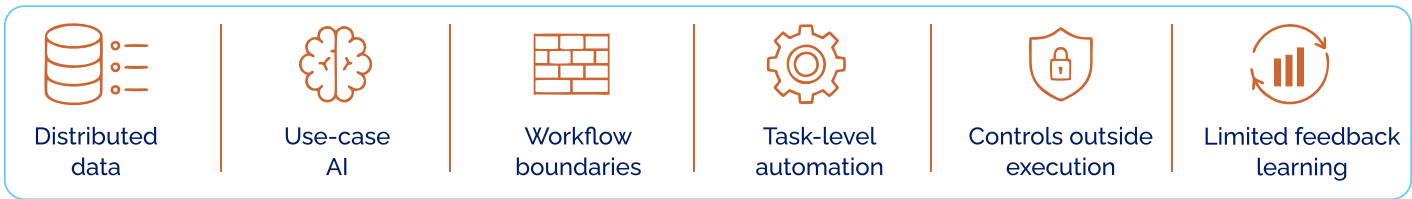

Why the linear model is breaking down

-  Customer journeys cut across products, channels, data and controls
-  Decisions in one area trigger actions elsewhere
-  Data shifts decisions in real time
-  Controls must move with execution

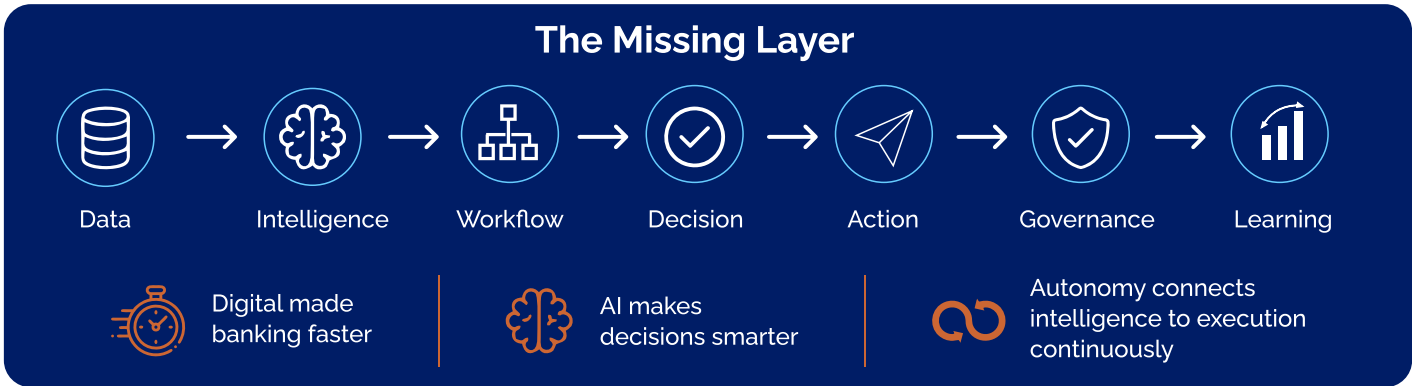

“ The problem is not a lack of digital capability. It is a lack of connected execution. ”

The challenge is no longer to digitize more processes or add AI to isolated decisions. It is to connect the enterprise so intelligence can move from context to decision to action and back again.

What creates fragmentation

The Missing Layer

The opportunity is to move from transformation projects to a **transformation fabric**.

What Will Your Financial Institution Transform Next?

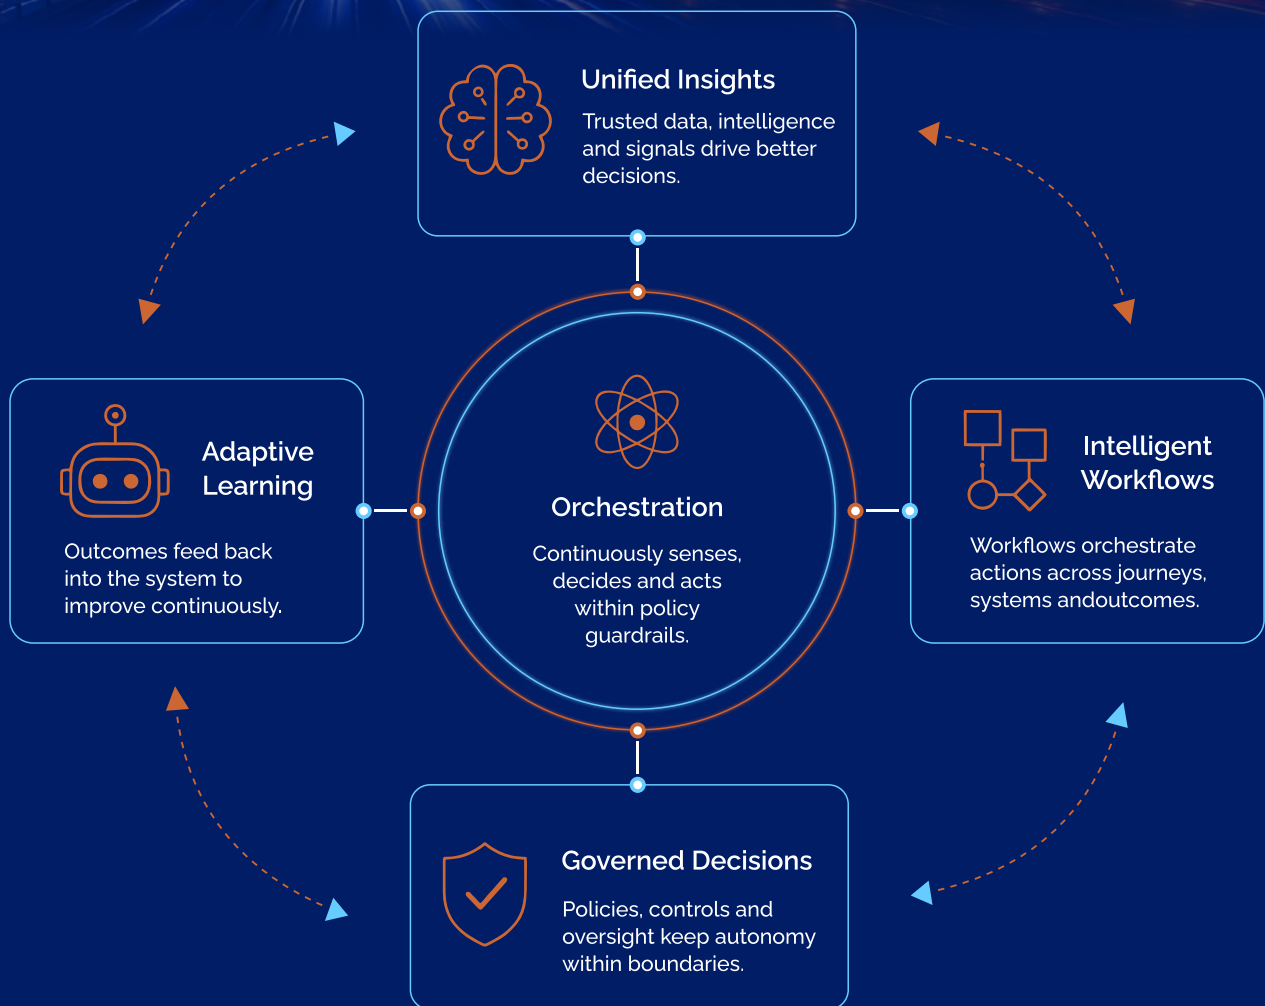

Connected execution across the financial institution. Transformation does not stop at one journey. The same intelligence, data and orchestration foundation can continuously transform the next journey.

A future-ready platform that enables financial institutions to continuously transform **every journey, every decision and every interaction** - without rebuilding the foundation each time.

Introducing ScoreMe's Autonomous Enterprise Platform

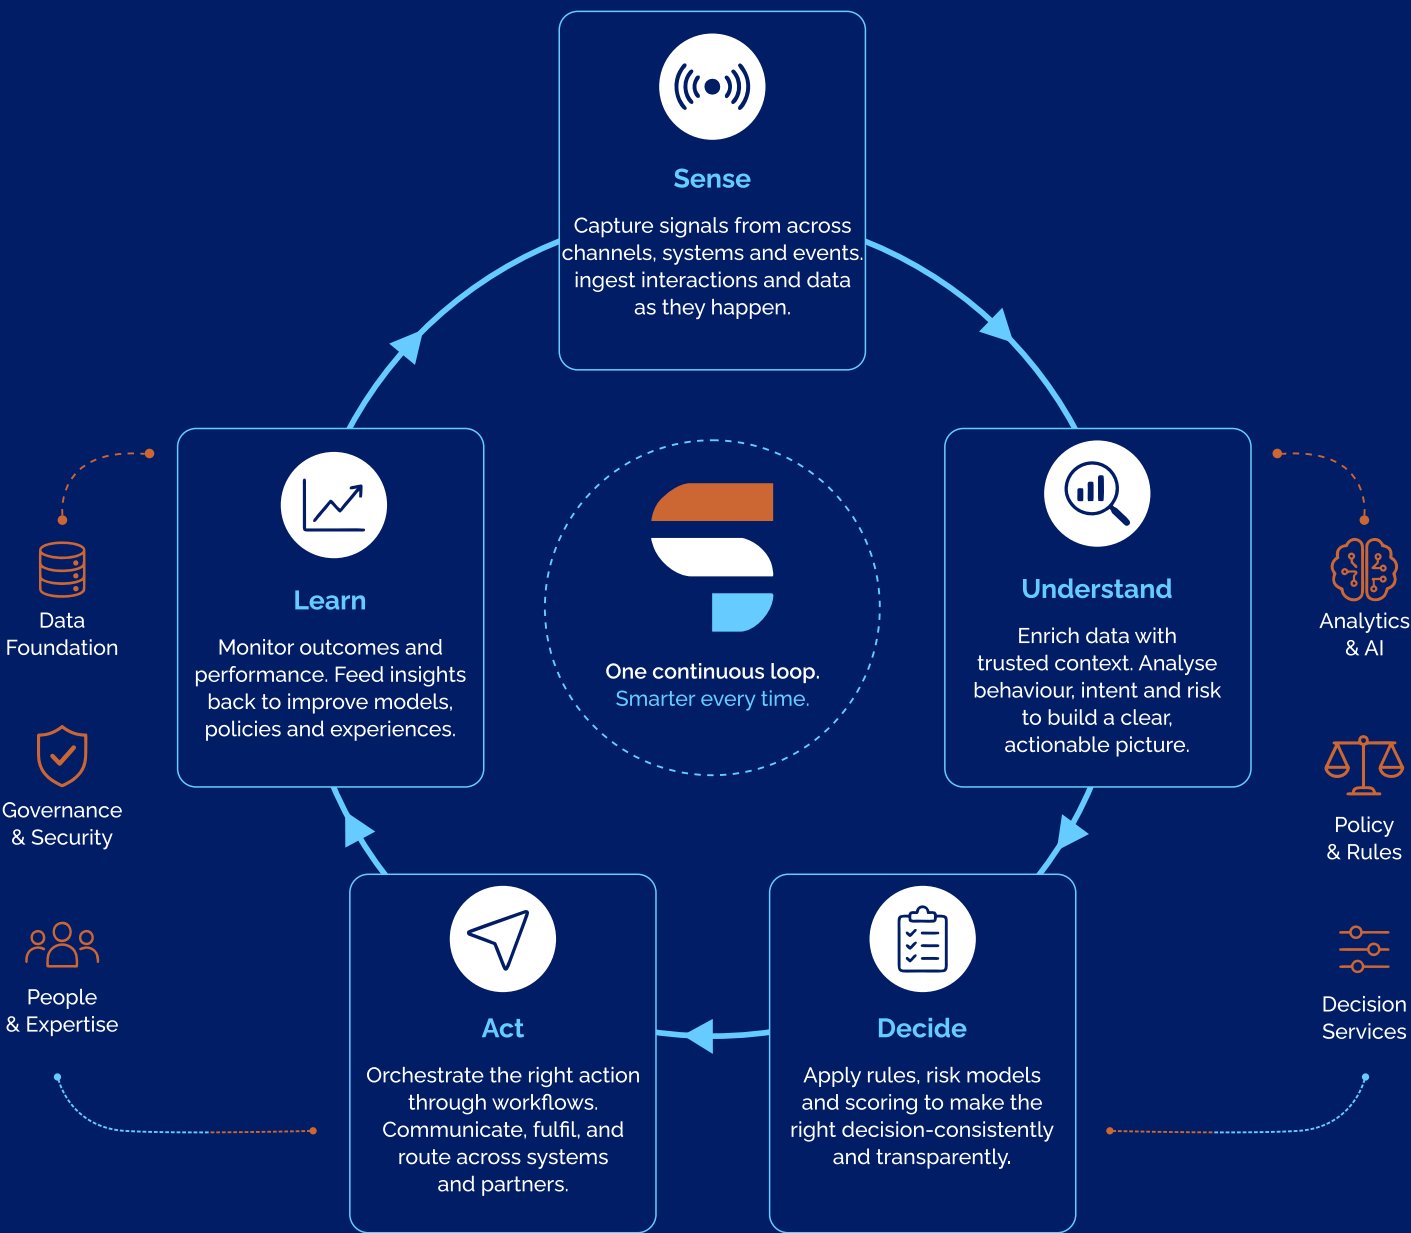

From Digital Transformation to Connected Execution.
From Connected Execution to Autonomous Enterprise.

The Autonomous Loop

A continuous operating model that turns data and decisions into measurable outcomes.

Better decisions. Better experiences. Better outcomes.

Delight customers with relevant, timely interactions

Manage risk and compliance confidently

Drive performance with smarter, data-driven actions

Improve efficiency through automation and scale

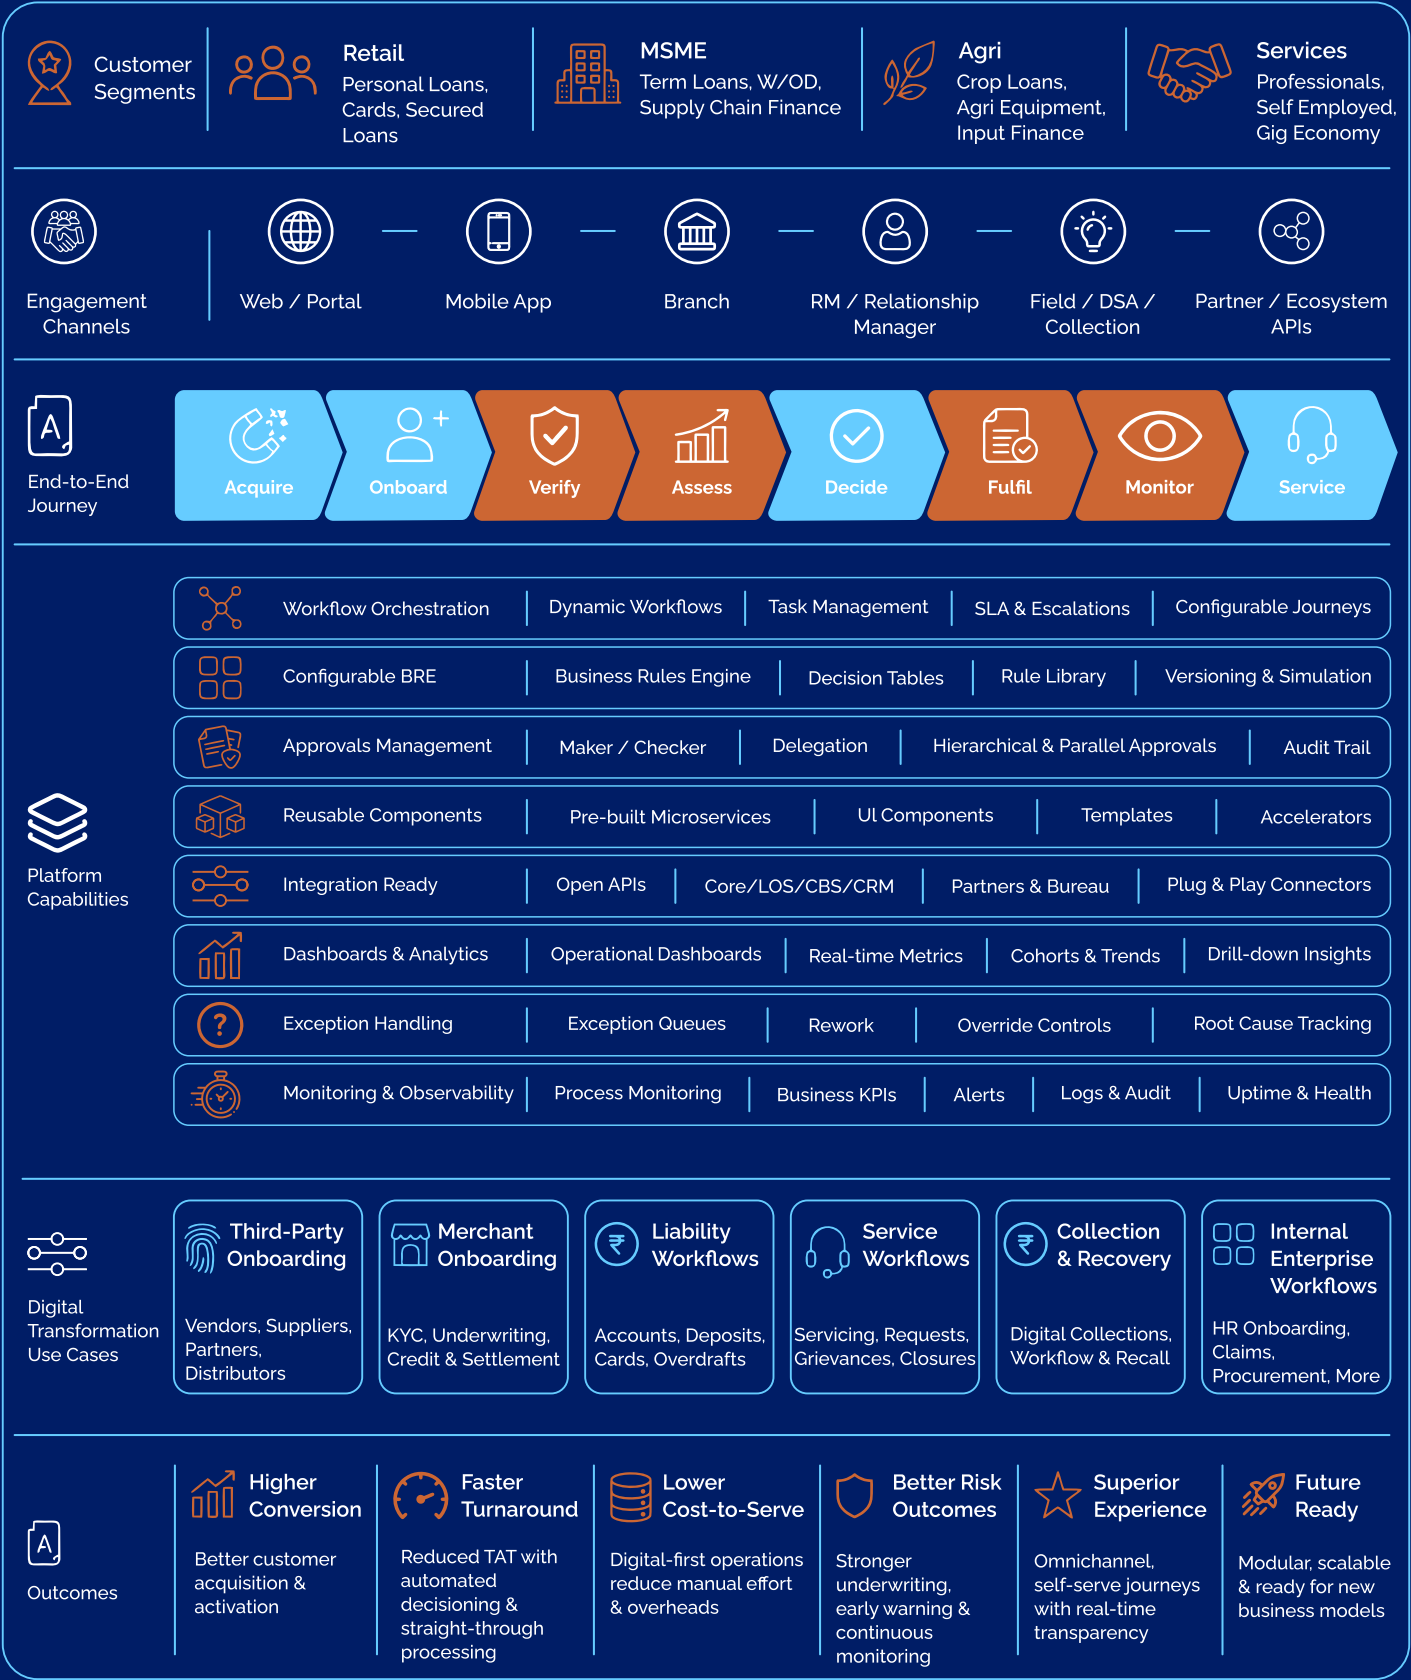

Create a compounding advantage through continuous learning

Digital Transformation Use Cases

Third-Party Onboarding
Vendors, Suppliers, Partners, Distributors

Merchant Onboarding
KYC, Underwriting, Credit & Settlement

Liability Workflows
Accounts, Deposits, Cards, Overdrafts

Service Workflows
Servicing, Requests, Grievances, Closures

Collection & Recovery
Digital Collections, Workflow & Recall

Internal Enterprise Workflows
HR Onboarding, Claims, Procurement, More

Outcomes

Higher Conversion
Better customer acquisition & activation

Faster Turnaround
Reduced TAT with automated decisioning & straight-through processing

Lower Cost-to-Serve
Digital-first operations reduce manual effort & overheads

Better Risk Outcomes
Stronger underwriting, early warning & continuous monitoring

Superior Experience
Omnichannel, self-serve journeys with real-time transparency

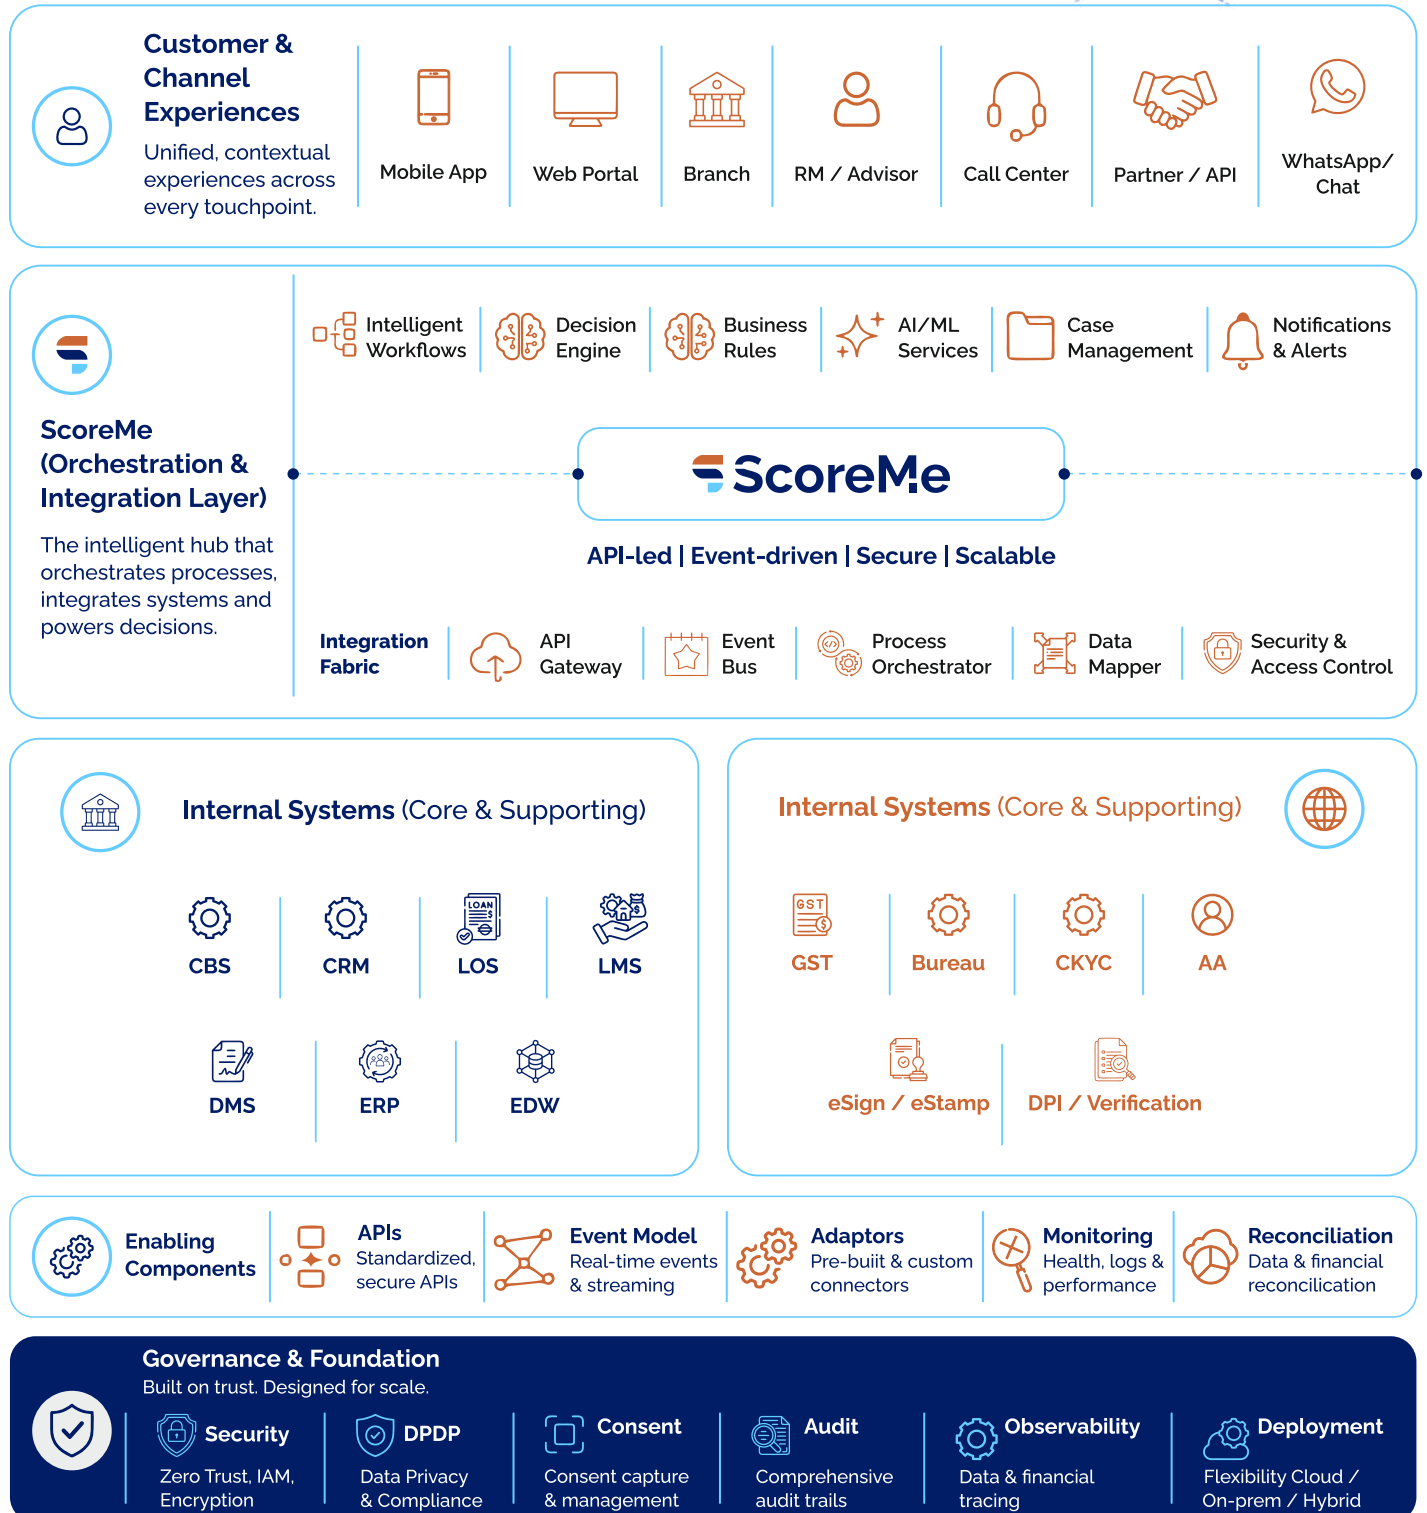

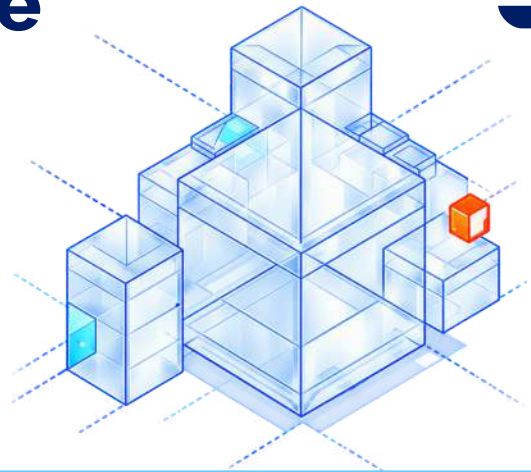

Future Ready
Modular, scalable & ready for new business models

Enterprise Architecture & Co-Existence

Built to transform around the core, not replace it.

ScoreMe is designed to sit at the heart of your digital layer-orchestrating intelligence, streamlining decisions, and extending seamlessly across your ecosystem.

Trusted Data Before Intelligent Decisions

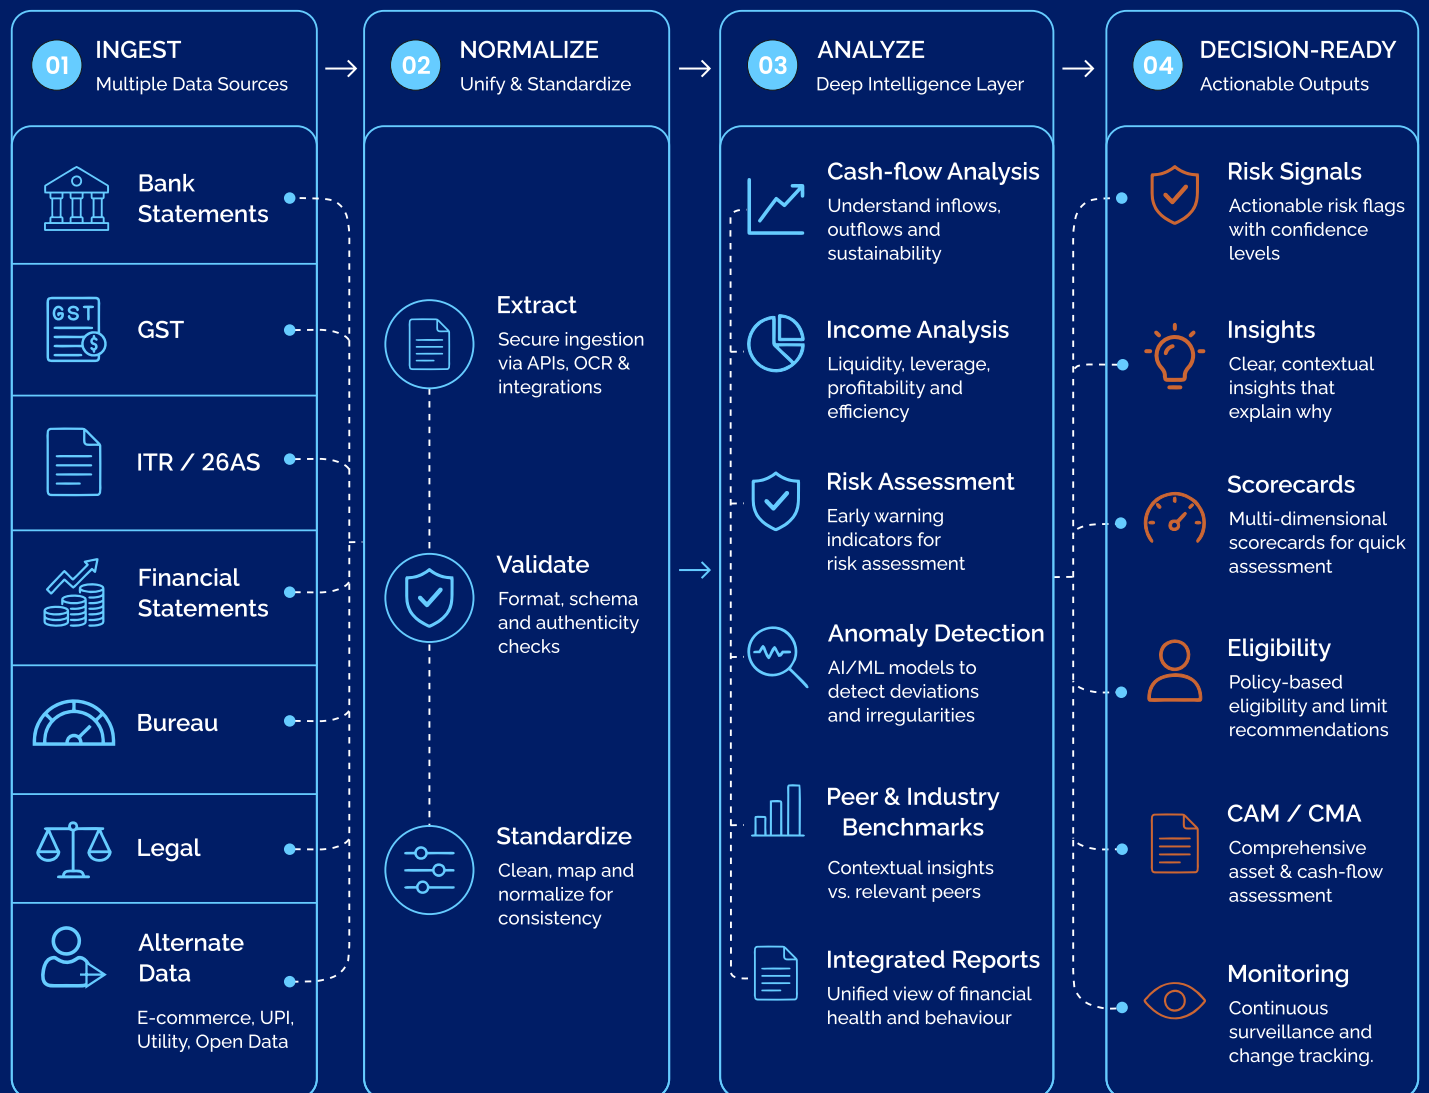

ScoreMe unifies verification, due diligence and data intelligence in a connected framework from 150+ Data Sources-so you can act with confidence, reduce risk and drive better outcomes.

Turning Financial Data into Decision-Ready Intelligence

ScoreMe converts fragmented financial data into structured, decision-ready intelligence.

The ScoreMe Advantage

Comprehensive 360° View

All critical data, one unified view.

Stronger Risk Assessment

Identify risk early. Mitigate with confidence.

Faster Decisions, Better Outcomes

Reduce turnaround time. Improve decision quality.

Scalable for Growth

Built to adapt, scale, and grow with your portfolio.

Intelligence that drives confidence.
Decisions that drive growth.

Trusted Across The Financial Services Ecosystem

Empowering financial institutions with trusted data, intelligence and digital solutions-at scale.
